SUMMARY

I'm a **Software Engineer** with **6+ years of experience** in commercial development. My main direction is frontend development in the **MERN stack** for the **last 4+ years**. Passionate about **software development, automation, and performance optimization**, I continuously expand my knowledge through books, online courses, and hands-on projects. Beyond coding, I'm an enthusiast of tech innovation and music production.

EXPERIENCE

Software Engineer

M Lab Studio

01/2023 - Present

Remote | Full Time

- **Developed** 6 large-scale projects, including custom React & TypeScript plugins, enhancing system functionality and performance.
- **Estimated** new projects and gathered requirements to define technical solutions, ensuring **100% on-time delivery**.
- **Designed and implemented** responsive, high-performance UIs, **leading to a 30% increase in user engagement**.
- **Conducted** onboarding and code reviews, improving **team efficiency by 20%** and reducing code defects.
- **Optimized** and maintained existing codebases, improving scalability and achieving **95%+ PageSpeed Insights scores**.
- **Built** a high-quality company website, resulting in a **25% increase in client inquiries** and **15% higher conversion rates**.

Software Engineer

PopArt Studio

01/2021 - 09/2023

Hybrid | Full Time

- **Hired** as a Frontend Developer and later **promoted** to Software Engineer after successfully delivering a **large-scale e-commerce store** for a major client and contributing to multiple other e-commerce platforms.
- **Collaborated** in agile teams of up to **8 members**, working closely with backend developers, QA engineers, and project managers to optimize system performance and user experience.
- **Ensured** consistent **90%+ PageSpeed Insights scores**, improving SEO rankings and website performance.
- **Crafted and deployed 15+ projects**, including custom web applications and scalable solutions, while maintaining **3 enterprise-level projects** under NDA.

Frontend Developer

Wespero Studio

01/2019 - 01/2021

Remote | Full Time

- **Created** 2 e-commerce stores, 5 landing pages, and 4 corporate websites with fully responsive designs and optimized performance to enhance user engagement, brand visibility, and lead generation.
- **Worked** in a team of 4, closely collaborating with backend developers to **turn Figma designs into functional websites**.
- **Configured** servers, deployed projects, managed **cPanel configurations**, set up server settings, and integrated Git for version control.
- **Implemented** SEO best practices in code, resulting in a **30%+ increase in potential website traffic**.

EDUCATION

Self-Taught Software Engineer

01/2019 - Present

- **Self-Taught Software Engineer:** Completed various courses, mentorship programs and technical books on JavaScript, React.js, Next.js, Node.js and software architecture.
- **Continuous Learning:** Regularly improving skills through industry best practices, open-source contributions and hands-on experience with modern web technologies.

TECHNICAL SKILLS

- **Frontend:** JavaScript, TypeScript (GSAP, Barba.js...), React.js, Next.js, ContextAPI, Redux.js (Redux toolkit), Sass (CSS), Material UI, Styled Components, Webpack, Vite, Parcel.
- **Backend:** Node.js, Express.js, PHP (Laravel, WordPress), MySQL, GraphQL.
- **DevOps:** Docker, Docker Compose, Git, GitHub, GitLab.
- **Testing:** Jest | Unit Testing.
- **Patterns & Approaches:** GoF, SOLID, DDD, TDD, GitFlow.
- **Languages:** Serbian | Native, English | Level B2.
